Risks

Risks: In addition to the general stock market risk that securities may fluctuate in value, growth stocks can react differently to issuer, political, market and economic developments than the market as a whole. The Fund is non-diversified, which means it may have a greater percentage of its assets in a single issuer, sector or industry than a diversified fund. The Fund invests in companies of all sizes, including small and medium sized companies whose securities may be thinly traded and more difficult to sell during market downturns.
